PROJECTS / OPEN-SOURCE

Course Registration Management System | [Link](#) *Java, Spring Boot, MySQL, HTML, CSS, JavaScript, REST APIs*

Developed a full-stack web application that allows students to register for courses and enables admins to manage registrations efficiently through a dashboard.

Built 6+ REST API endpoints using Spring Boot to support real-time Create, Read, Update, Delete (CRUD) operations.

Designed and integrated a MySQL database storing 1000+ records with automatic timestamps.

Implemented a modern UI using HTML, CSS, and JavaScript, reducing manual registration effort by 80%.

Added instant search, edit, and delete actions on the admin dashboard with <1 second response time using Fetch API.

Smart Hostel Menu Optimizer | [Link](#)

Python Pandas, Matplotlib, Seaborn, Streamlit

Analyzed 1,000+ student feedback points to identify low-rated dishes and improve menu planning.

Built dashboard for real-time insights, satisfaction analytics & dish recommendation.
